Like wearing nothing at all^{1,2,3}

Patients can sleep how they want with the freedom and comfort of DreamWear^{1,2,3}

Over the last five years, you have come to know the benefits of the Philips Respironics DreamWear system of masks. It allows patients to easily swap cushions so that they can find a fit that's right for them. Our innovative design directs airflow through the frame so patients can wear glasses, watch TV and sleep comfortably. And, the tubing connection located at the top of the head allows patients to sleep in any position – stomach, side or back.

Users told us that DreamWear came closest to making them feel like they have nothing on their face during therapy and that they experienced more freedom of movement than with their prescribed mask.^{1,2,3}

Give your patients comfort, fit and exceptional seal with DreamWear silicone pillows cushion

The mask patients love just got a lot more comfortable. DreamWear silicone pillows cushion mask was developed using thousands of 3D facial scan data points, allowing it to conform to various nose shapes and sizes. It features a silicone pillows cushion that's softer to the touch than gel pillows while delivering an exceptional seal.

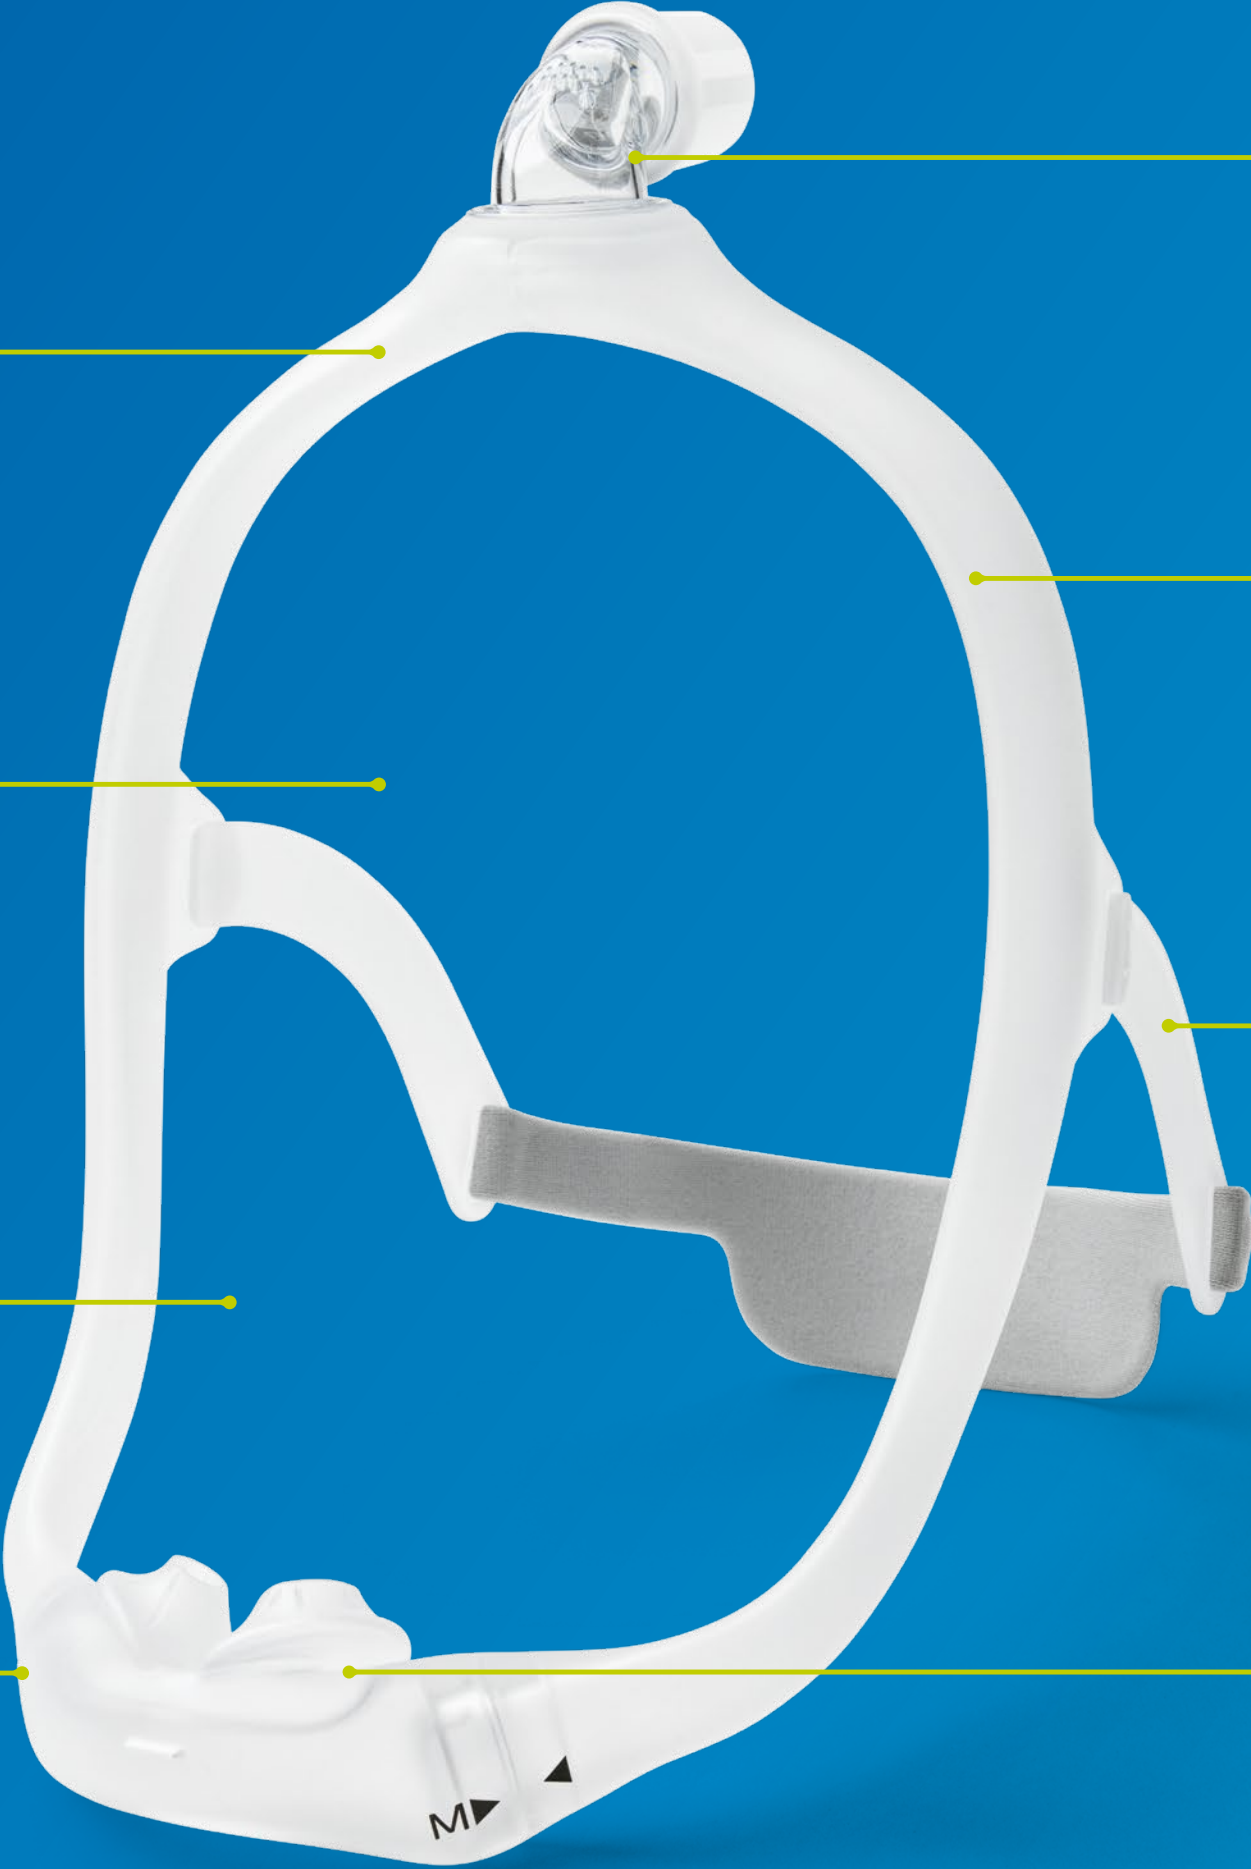

Users say DreamWear silicone pillows mask has a more secure fit and seal than their prescribed mask.⁴

DreamWear silicone pillows mask is lighter and users find the cushion softer than ResMed AirFit P30i.⁵

Note: Switching from a nasal cushion or silicone pillows cushion to a full face cushion requires different headgear and instructions. Consumers must consult their provider before making adjustments.
References: 1. DreamWear Under the Nose Nasal: Data analysis at 30 days of use of 2015 Philips sponsored patient preference trial (n=98). Prescribed masks include ResMed Swift FX, ResMed Mirage FX, Philips Wisp, and ResMed P10. Data analysis at 10 days of use of 2019 Philips sponsored patient preference trial (n=81). Prescribed masks include ResMed AirFit N10, N20, Mirage Fx, Philips Wisp, Pico, ComfortGel Blue, F&P Eson & Eson 2. 2. DreamWear Full Face: Data analysis of Aug 2017 Patient Preference trial where (n=85) and prescribed masks include ResMed AirFit F10 and F20, Respironics Amara View and F&P Simplus. 3. Data analysis from a 30 day patient preference study with (n=127) nasal pillows users, conducted July 2020. Prescribed masks included ResMed AirFit P10, P30i, ResMed Swift Fx, F&P Brevida, Philips DreamWear Gel Pillows, Nuance / Pro. 4. Fit & Seal tested individually. After 30 day of use during Jul/Aug 2020. Pillows preference trial with (n=127). Prescribed masks include ResMed AirFit P10, P30i, Swift Fx, F&P Brevida, Philips DreamWear Gel Pillows, Nuance / Pro. 5. Data from Philips conducted comparable assembly weight test for DreamWear Gel Pillows, DreamWear Silicone Pillows & ResMed AirFit P30i mask. Cushion softness & mask weight tested individually.

DreamWear

Soft silicone frame
Light, flexible material designed for comfort.

Top-of-head tube connection
Provides freedom of movement throughout the night.

In-frame airflow
Unique design allows airflow through the frame to help patients sleep comfortably.

Open field of vision
Wear glasses, read and watch TV.

Headgear with arms
Soft, slip-resistant design provides more stability.

No red marks*
Leaves no marks on the bridge of the nose.

Innovative
Under-the-nose design.

Interchangeable cushions
Easily switch between full face, nasal and our latest silicone pillows cushions

Note: Switching from a nasal cushion or silicone pillows cushion to a full face cushion requires different headgear and instructions. Consumers must consult their provider before making adjustments.
*Mask does not directly contact the bridge of the nose or nostrils.

One mask

fits all three cushion types

Simply switch cushions without changing masks

Choosing the right mask for your patients is one of the most difficult jobs you face. The nonstop trial and error involving the masks, cushions and headgear needed to fit your patients becomes tedious and time-consuming.

On top of that, you must manage patients in their initial acceptance period who struggle for a variety of reasons, including poor fit, leaking, nasal congestion and others.

DreamWear's design allows you to quickly and easily switch between full face, nasal and our latest silicone pillows cushions without changing masks.¹ With fewer mask decisions to make, you can focus on what's really important: your patients.

Benefits

- Can accommodate full face, nasal and silicone pillows cushions
- Allows for easy switching between cushion types¹

3 out of 4 patients find DreamWear silicone pillows mask more comfortable than their prescribed mask.²

Mask Selector 3D

Introducing the Philips Respironics Mask Selector – the first and only clinically validated mask selection, sizing and fitting solution that helps clinicians fit patients with the right mask from the start.³

Our premium technology using a 3D camera takes, in roughly 20 seconds, 150 pictures of a person's face. Our system gathers 100,000 key data points of facial topography from each picture for a total of 15,000,000 data points per patient.

- ✓ All DreamWear mask types can be fit using Mask Selector 3D – silicone pillows, nasal and full face
- ✓ Mask Selector 3D is the first and only clinically validated mask selection, sizing and fitting solution that helps clinicians fit patients with the right mask from the start³
- ✓ Helps reduce refits, supports operational efficiency and helps to eliminate trial and error³
- ✓ Patients are more likely to continue wearing their recommended mask⁴ and are more confident they will continue to use their recommended mask when set up with Mask Selector⁵

DreamWear **patient fitting guide**

Follow the instructions to get started fitting your full face, nasal or silicone pillows mask

Full face

Using the full face sizing gauge, hold horizontally under the nose and select the cushion size based on where the outer edge of your nostrils and tip of your nose contact the gauge.

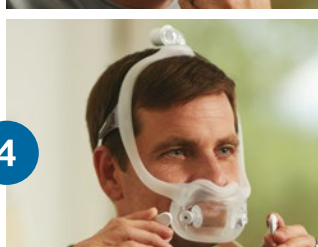

Note: Four cushion sizes (small, medium, large, medium-wide) are available. Please refer to your instructions for use for further fitting information.

- 

The cushion opening will be directly under the nostrils. The cushion will hug the nose and mouth, and leak will be minimal.

Note: At no time should the nose be inside of the cushion opening. If any part of the cushion overlaps the nose, the cushion is being worn incorrectly. A different size cushion may be needed.
- 

With the mask assembled, place the cushion under the nose.
- 

Position the frame on the top of the head. Pull the headgear over the back of the head.
- 

Attach the magnetic headgear clips to the mask cushion.
- 

To adjust the mask, peel the headgear tabs away from the fabric. Adjust the length of the top straps. Press the tabs back against the fabric to reattach. Repeat this step with the bottom straps.

Note: Do not overtighten the headgear.
- 

Position the mask until it fits comfortably. When finished, the elbow should rest at the top of the head.

Note: Please read the instructions for use for further fitting information.

Nasal

Using the nasal cushion sizing gauge (included with the mask), hold it horizontally under the nose. Select the cushion size based on where the outer edge of the nostrils and tip of the nose contact the gauge.

Note: Four cushion sizes (small, medium, large, medium-wide) are available. Please refer to your instructions for use for further fitting information.

- 

The cushion opening will be directly under the nostrils. The cushion will hug the nose and leak will be minimal.

- 

Position the mask until it fits comfortably. When finished, the elbow should rest at the top of the head.

Note: Please read the instructions for use for further fitting information.

Silicone pillows

Using the silicone pillows sizing gauge, place the pillows cushion tips into the nostrils. Choose the cushion size that allows the silicone bases to sit comfortably under the nose without any gaps.

Note: Four cushion sizes (small, medium, large, medium-wide) are available. Please refer to your instructions for use for further fitting information.

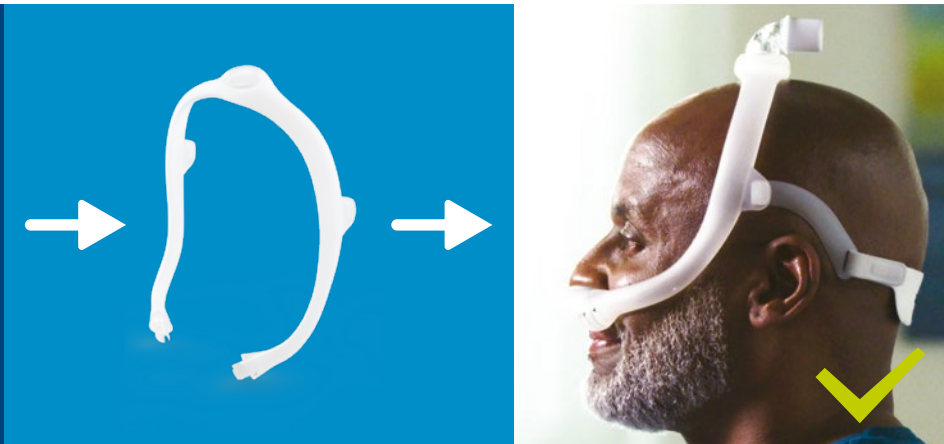

Making it simple to find the right fit

Achieving the right fit with DreamWear is easy

Medium frame sizing

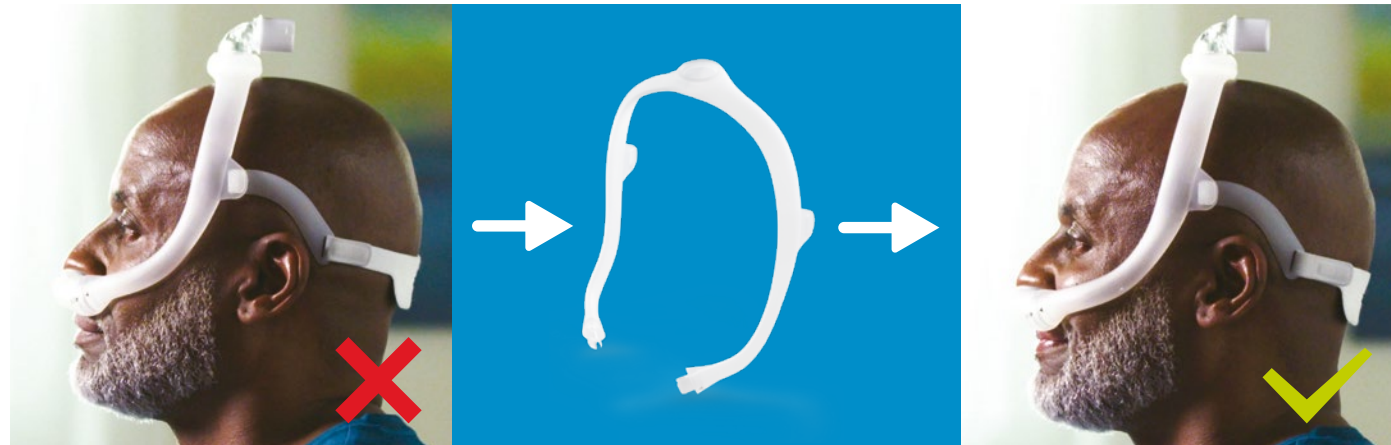

The medium mask frame will comfortably fit most faces. If the medium frame does not fit a patient's face, a small or large mask frame might better suit your patient's needs.

Medium correct frame

Proper fit

Large frame sizing

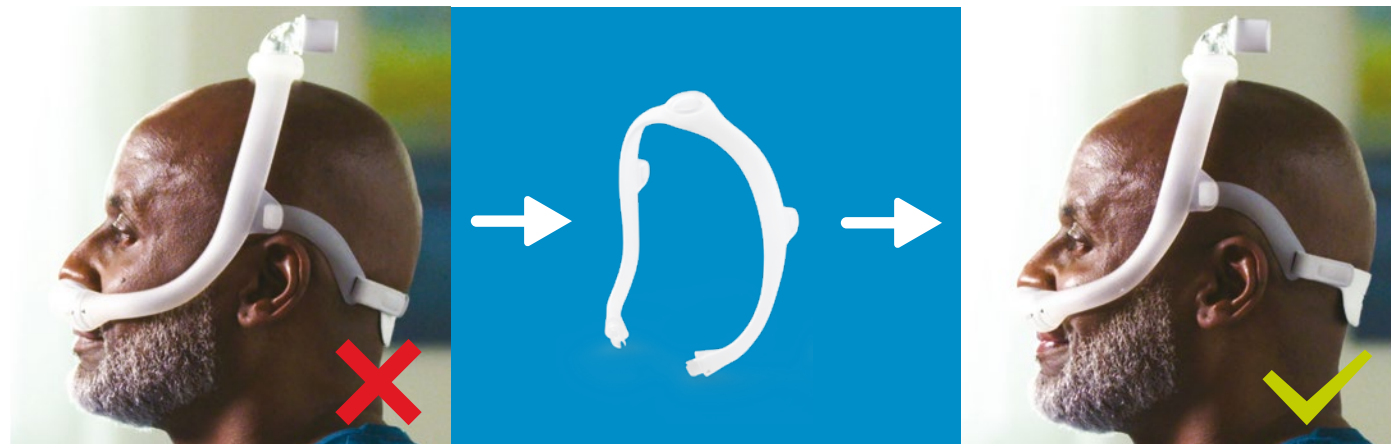

Mask too small
